Foreword

Each year the Commission Directorate- General for Agriculture and Rural Development publishes the "Agriculture in the European Union - Statistical and economic information" A large part of the report is devoted to statistical information on Community agriculture. This is drawn up on the basis of information from Eurostat and data collected by the Directorate-General for Agriculture and Rural Development.

The statistical information presented here covers a wide range of subjects: the economic situation in agriculture, structures, trade, markets, financial aspects and rural development. An introductory chapter gives an overview of the 2011 agricultural year. It includes a wide range of statistical information on agriculture in the 27 Member States and in the accession Countries for EU membership.

Contents

Foreword-----	3
The 2011 agricultural year-----	12
Statistical and economic information -----	25
Codification of the tables -----	26
Key to symbols, names and abbreviations -----	27
Currency units used in this report -----	30
Observations on statistical method -----	32
Remarks -----	36

Table No

1 INTRODUCTION

1.0.1 Exchange rates

2 BASIC DATA

2.0.1.1 Basic data – key general statistics

2.0.1.2 Basic data – key agricultural statistics (*split to 2.0.1.3*)

2.0.1.3 Basic data – key agricultural statistics (*2nd part 2.0.1.2*) □

3 ECONOMIC DATA

3.1 The agricultural economy

3.1.1 Shares of products in agricultural production

3.1.2 Individual Member States and Candidate Countries' share in agricultural production

3.1.3 Farm inputs: breakdown by Member State and Candidate Countries

3.1.4 Situation of the:

(a) output of the agricultural industry

(b) consumption of inputs

(c) gross added value at basic prices

(d) factor income

3.1.5 Value of agricultural production, crop production and livestock production

3.1.6 Movements in output volume in the agricultural activities sector, in intermediate consumption, in gross added value (at basic prices) and in net added value (at basic prices)

3.1.7 Movement in the implicit index of output prices in the agricultural industry value/volume (nominal)

value/volume, deflated by GDP implicit price index (real)

3.1.8 Evolution of the implicit price index of intermediate consumption: value/volume (nominal)

value/volume, deflated by GDP deflator (real)

3.1.9 Movements in productivity of intermediate consumption and terms of trade

3.1.10 Gross fixed capital formation and gross value-added in agriculture at basic prices

3.1.12 Indices of real income from agricultural factors, per annual work unit (AWU)

3.1.13 Volume of agricultural labour in annual work units (AWUs)

3.1.14.1 Changes in intermediate consumption by volume

3.1.14.2 Input (volume) indices

3.1.15 Agriculture by region: major economic indicators and the share of individual products

3.2	FADN
3.2.1	The farm accountancy data network – Explanatory note
3.2.2	The eight types of farming: shares of each enterprise in total output
3.2.3	Accountancy results by type of farming
3.2.4	Results by economic size of holding in the EU
3.3	Prices and production costs
3.3.1	Agricultural prices and amounts of Community aid (beginning of marketing year)
3.3.2	Producer prices for agricultural products in the EU (excl. VAT)
3.3.3	Producer price indices (excl. VAT)
3.3.4	Annual rate of change of: (a) consumer prices for foodstuffs and beverages (b) producer prices for agricultural products
3.3.5	Input prices (excl. VAT)
3.3.6	Agricultural input prices and producer prices (excl. VAT)
3.3.7	Price indices for feedingstuffs, fertilizers and soil improvement, fuels and lubricants, and investments in machinery (excl. VAT)
3.3.8	Market value of agricultural land (parcels)
3.3.9	Rents for agricultural land
3.3.10	Trend of purchase prices of agricultural inputs (excl. VAT)
3.3.13.1	Producer prices in the Member States and Candidate Countries
3.4	Financial aspects
3.4.1	Budgetary expenditure on the common agricultural policy
3.4.2	EAGGF Guarantee and Guidance expenditure (2004 to 2006), EAGF and EAFRD expenditure (2009) by Member State
3.4.3.1	Agricultural and Rural Development' Policy Area expenditure
3.4.4	Breakdown of EAGF expenditures by sector, according to the economic nature of the measures
3.4.5	Quantity and value of products in public intervention stores of the intervention agencies
3.4.9	Implementation of budget (Rural Development)
3.4.10	National expenditures for agriculture
3.5	Structures
3.5.1	<i>Employment in agriculture</i>
3.5.1.1	Employment in agriculture: statistical sources and applications
3.5.1.2	'Persons employed' in 'agriculture, hunting, forestry and fishing'
3.5.1.3	Employment in agriculture and in the other sectors
3.5.1.4.	Employment in agriculture and in the other sectors: structures compared
3.5.1.5.1	Employment in agriculture: persons working on agricultural holdings
3.5.1.5.2	Employment in agriculture: breakdown by type of labour
3.5.1.6	Employment in agriculture: working hours and combined other employment of farmers
3.5.2	<i>Land use</i>
3.5.2.2.	Main crops, by Member State and Candidate Countries
3.5.3	<i>Livestock numbers</i>
3.5.3.3	Cattle numbers and number of holders
3.5.3.4	Changing structure of cattle farms, by Member State and Candidate Countries
3.5.3.5	Changing structure of cattle farms, by herd size class
3.5.3.6	Dairy cow numbers and number of holders
3.5.3.7	Changing structure of dairy farms, by Member State and Candidate Countries
3.5.3.8	Changing structure of dairy farms, by herd size class
3.5.3.9	Pig numbers and number of holders

- 3.5.3.10 Changing structure of pig farms, by Member State and Candidate Countries
- 3.5.3.11 Changing structure of pig farms, by herd size class
- 3.5.4 ***Farm structures***
 - 3.5.4.1 Number and area of holdings
- 3.6 **Implementation of the common agricultural policy (CAP)**
 - 3.6.1 ***Impact of CAP reform***
 - 3.6.1.1 Overview of the implementation of direct payments under the CAP in Member States
 - 3.6.1.2 36121 Budgetary ceilings for Single Payment Schemes in Member States
 - 36122 Budgetary ceilings for direct payments to be granted under Article 70 of regulation (EC) No 1782/2003 and Article 87 of regulation (EC) No 73/2009
 - 3.6.1.3 Single Area Payment Scheme - areas.
 - 3.6.1.4 36141 Annual financial envelopes for the single area payment scheme
 - 36142 Maximal amount of funds available for the Member States for granting the separate sugar payment referred to in article 126 of regulation (EC) No 73/2009.
 - 3.6.1.5 Budgetary ceilings for direct payments to be granted under Articles 66 to 69 of Regulation (EC) N°. 1782/2003
 - ~~3.6.1.7 Aid for energy crops.~~
 - ~~3.6.1.8 Aid for energy crops – Evaluation – Regulation (EC) N° 1973/2004 Article 3(1)(b)a~~
 - ~~3.6.1.10 Suckler cow premium: national ceilings and premiums granted~~
 - ~~3.6.1.11 Special premium for male bovine animals: regional ceilings and number of premiums granted~~
 - ~~3.6.1.12 Slaughter premium: national ceilings and premiums granted~~
 - ~~3.6.1.13 Ewe and goat premium: potential rights and applications for premiums~~
 - 3.6.1.14 Direct payments to the producers by size class paid by EAGF - Regulation (EC) n°1782/2003
 - 3.6.2 ***Rural development policy results***
 - 3.6.2.1 Measure: Early retirement - Regulation (EC) No 1698/2005 art. 23.
 - 3.6.2.2. Measure: Less Favoured Areas (holdings receiving compensatory allowances by predominant LFA type) - Regulation (EC) N° 1698/2005 art.37
 - 3.6.2.3 Measure: Agri-environment - Regulation (EC) No 1698/2005 art. 39.
 - 3.6.2.4 Measure: Afforestation of agricultural land - Regulation (EC) No 1698/2005 art. 43
 - 3.6.2.5 Measure: Afforestation of non-agricultural land - Regulation (EC) No 1698/2005 art.43
- 3.7 **Trade**
 - 3.7.1 World exports and EU external trade in all products, agricultural products and other products
 - 3.7.2 EU trade by product (CN chapters)
 - 3.7.3 Exports of agricultural products by the EU and some other countries
 - 3.7.4 Imports of agricultural products by the EU and some other countries
 - 3.7.5 World production and trade in the principal agricultural products – The EU share of the world market
 - 3.7.6 EU trade in agricultural products, according to principal customer countries
 - 3.7.7 EU trade in agricultural products, according to principal supplier countries
 - 3.7.8 EU imports and exports (by product and aggregate)
 - 3.7.10 EU imports of agricultural products from various groups of countries
 - 3.7.11 Agricultural product exports from the EU to various groups of countries
 - 3.7.12 EU trade with ACP countries
 - 3.7.13 EU trade with Mediterranean countries

- 3.7.14 EU trade in agricultural products
- 3.7.15 Intra-EU trade (by product and aggregate) on the basis of arrivals and dispatches
- 3.7.19 EU trade with Candidate Countries
- 3.7.21 EU trade with the United States of America
- 3.7.23 EU trade with the MERCOSUR countries
- 3.7.24 EU trade with the NAFTA countries

- 3.8 **Consumption and self-sufficiency**
- 3.8.2 Human consumption of certain agricultural products
- 3.8.3 Self-sufficiency in certain agricultural products

4 AGRICULTURAL MARKETS

4.1 Cereals

- 4.1.1.1 Area, yield and production of common and durum wheat
- 4.1.1.2 Area, yield and production of rye and barley
- 4.1.1.3 Area, yield and production of oats and mixed cereals and maize
- 4.1.1.4 Area, yield and production of other cereals and total cereals (excluding rice)
- 4.1.2.1 World production of cereals and production in main exporting countries
- 4.1.3.1 The EU's share in world cereals trade
- 4.1.4.1 Supply balances– durum wheat– common wheat
- 4.1.4.2 Supply balances– barley– rye
- 4.1.4.3 Supply balances – maize– oats
- 4.1.4.4 Supply balances – other cereals– total cereals (excluding rice)
- 4.1.5.1 Producer prices of certain cereals
- 4.1.5.5 Cif Rotterdam prices for cereals
- 4.1.6.2 Market prices for cereals as a percentage of the intervention price
- 4.1.6.3 Intervention stocks in the EU at the end of the marketing year

4.2 Rice

- 4.2.1.1 Area, yield and production of rice (paddy)
- 4.2.4.1 Supply balance – rice
- 4.2.5.1 Cif Rotterdam prices for long-grain rice
- 4.2.6.1 Market prices for Community paddy rice compared with intervention prices

4.3 Sugar

- 4.3.1.1 Area under sugarbeet, yield and production of sugar
- 4.3.2.1 World production of sugar and production of the main producing and/or exporting countries
- 4.3.3.1 World supply balance and international trade in sugar
- 4.3.4.1 Sugar supply balance
- 4.3.5.1 Average world sugar prices
- 4.3.6.1 Sugar and isoglucose production, by quota

4.4 Oilseeds, oils and fats

- 4.4.1.1 Area, yield and production of: rapeseed; sunflower seed; and soya beans in the EU
- 4.4.3.1 Internal and external trade of: rapeseed; sunflower seed; soya beans; and flax seed
- 4.4.4.1 Supplies of rape and colza (seed, oil, cake)
- 4.4.4.2 Supplies of sunflower (seed, oil, cake)
- 4.4.4.3 Supplies of soya (seed, oil, cake)
- 4.4.4.4 Supplies of olive oil
- 4.4.5.1 Fixed prices and average market prices in Greece, Spain and Italy for olive oil
- 4.4.5.3 Average monthly prices for oilseed products

4.5 Fruit and vegetables

- 4.5.1.1 Area, yield and harvested production in the EU and Candidate Countries of: (a) fruit; (b) citrus fruit; (c) vegetables
- 4.5.3.1 Intra-EU trade and external trade in fresh fruit and vegetables
- 4.5.5.1 Producer prices of certain types of fruit and vegetables
- 4.5.6.1 Quantities of fruit and vegetables bought in

4.6	Wine
4.6.1.1	Area under vines, yield and production of wine and must
4.6.3.1	Trade in wine and share in world trade
4.6.4.1	Supply balance – wine
4.7	Potatoes
4.7.1.1	Area, yield and production of potatoes
4.7.1.2	Area, yield and production of early potatoes
4.8	Tobacco
4.8.1.1	Area, yield and production of leaf tobacco, by groups of varieties
4.8.3.1	EU share of world trade in raw tobacco
4.8.3.2	EU tobacco exports to third countries
4.8.3.3	Total imports and exports of unmanufactured tobacco and tobacco refuse
4.9	Seeds
4.9.1.1	Seed production
4.9.1.2	Seed areas accepted for certification
4.10	Hops
4.10.1.1	Number of holdings, area, yield and production of hops in the EU
4.10.4.1	Market balance – hops
4.11	Fibre flax, cotton and silkworms
4.11.1.2	Area, yield and production of fibre flax and hemp
4.11.1.3	Output of silkworm cocoons and number of boxes of silkworm eggs used
4.11.3.2	Intra-EU trade and external trade in cotton fibre
4.11.5.3	Ginned cotton, world prices
4.13	Feedingstuffs – Fodder
4.13.7.3	Industrial production of compound feedingstuffs, by species and by Member State and Candidate Countries
4.13.7.8	EU supplies of dehydrated and dried fodder
4.13.7.9	Area, yield and production of dry pulses, feed peas and field beans in the EU and Candidate Countries
4.13.7.12	Cif offer price (Rotterdam) for Brazilian soya cake
4.14	Meat in general
4.14.1.1	Gross internal production and consumption of meat
4.14.3.1	Net balance of external trade in meat and self-sufficiency
4.15	Beef/veal
4.15.0.1	Cattle numbers (December of previous year)
4.15.1.1	Slaughterings of adult bovine animals, calves and young cattle
4.15.1.2	Net production of beef/veal in the EU (adult bovine animals calve sand youg cattle)
4.15.2.1	World production and production of principal beef/veal producing/exporting countries
4.15.3.1	Beef/veal – EU trade by species
4.15.3.2	Beef/veal – trade with non-member countries
4.15.4.1	Supply balance – beef/veal
4.15.5.1	Market prices for beef/veal
4.16	Pigmeat

4.16.0.1	Pig numbers (December of previous year)
4.16.1.1	Number of pigs slaughtered
4.16.1.2	Net pigmeat production
4.16.2.1	World production and gross domestic production of main pigmeat-producing or exporting countries
4.16.4.1	Supply balance – pigmeat
4.16.5.1	Market prices for pigmeat
4.17	Sheepmeat and goatmeat
4.17.0.1	Sheep and goat numbers (preceding December)
4.17.1.1	Sheep and goats slaughtered
4.17.3.1	Sheepmeat and goatmeat – EU trade, by species
4.17.3.2	Sheepmeat and goatmeat – trade with non-member countries
4.17.3.3	Imports of sheepmeat and goatmeat
4.17.4.1	Supply balance – sheepmeat and goatmeat
4.17.5.1	Market prices for sheepmeat
4.18	Poultrymeat
4.18.0.1	Number of utility chicks of table strains hatched
4.18.1.1	Gross internal production of poultrymeat
4.18.3.1	Trade in poultrymeat with non-member countries
4.18.4.1	Supply balance – poultrymeat
4.18.5.1	Market prices for chickens
4.19	Eggs
4.19.0.1	Laying hens, numbers
4.19.0.2	Number of utility chicks hatched from laying hens
4.19.1.1	Usable production of eggs (total eggs)
4.19.3.1	Trade in eggs with non-member countries
4.19.4.1	Supply balance – eggs (total eggs)
4.19.5.1	Market prices for eggs
4.20	Milk and milk products
4.20.0.1	Dairy herds and yield
4.20.1.1	Production of cows' milk and delivery to dairies
4.20.1.2	Deliveries of cows' milk to dairies, as a proportion of cows' milk production
4.20.1.3	Production of fresh milk and fresh milk products by the dairy industry
4.20.1.4	Production in dairies of butter and cheese
4.20.1.5	Production in dairies of milk powder
4.20.1.6	Production in dairies of concentrated milk and casein
4.20.2.1	World exports and production of– butter– cheese– casein
4.20.2.2	World exports and production of– whole-milk powder and skimmed-milk powder – Condensed milk
4.20.3.1	World trade in certain milk products – EU share
4.20.4.2	Detailed supply balance – skimmed-milk powder
4.20.4.3	Detailed supply balance – butter
4.20.5.1	Milk producer price
4.20.6.1	Intervention measures for butter and skimmed-milk powder
4.20.6.2	Application of the quota system (quotas for deliveries)
4.20.6.3	Community butter and skimmed-milk powder stocks
4.21	Honey
4.21.4.1	Supply balance – honey
4.22	Wood

- 4.22.1.1 Basic forest resources
- 4.22.3.1 EU external trade in forest products
- 4.22.3.2 EU external and intra-EU trade in timber and timber products by Member State

4.23 **Genetically modified organisms (GMOs)**

- 4.23.1.1 World areas sown to GMOs by country
- 4.23.1.2 World areas by crop (GMOs)

4.24 **Quality policy**

- 4.24.9.1 Protected designations of origin and protected geographical indications (Regulation (EC) no 510/2006): record of names registered
- 4.24.9.2 Certified and policy – supported organic and in conversion land area
- 4.24.9.3 Number of certified and policy – supported organic and in conversion farms

α = New table

Remark: The following tables of *The Agricultural Situation in the European Union – 2010* have not been repeated: 3.6.1.7, 3.6.1.8, 3.6.1.10, 3.6.1.11, 3.6.1.12, 3.6.1.13.

THE 2011 AGRICULTURAL YEAR

General overview

1. The **2011 agricultural year** in the EU was characterised by a 3.7% increase in the real agricultural (factor) income¹. This is the second year of income increase (+10% in 2010), following a sharp reduction in 2009 (-13%). The rise in 2011 was the outcome of increases in both the volume of the agricultural output (1.4%) and prices (5.7%) in the agricultural sector.

In 2011, the real value of EU crop production is estimated to have increased by 7.5% due to higher prices (5.7%) and volumes (1.7%). Prices rose for most crops markedly for cereals (18.3%), oilseeds (15.1%), forage plants (12.8%) and protein crops (11.6%) with the exception of fresh vegetables (-9.7%), olive oil (-1.4%) and flowers (-1.2%). Most products recorded higher volumes, in particular sugar beet (11%), wine, potatoes and fruits while lower volumes were recorded for protein crops (-16.3%), olives (-4.8%) and plants and flowers (-2.1%).

The increase in animal output value by 7.7% reflects a rise in both, producer prices (6.6%) and volume (1%). Prices increased for milk (9.2%), poultry (8.5%), cattle (8%), equines (7.2%), sheep and goats (5.2%) and pigs (4.4%) but decreased for eggs (-4.7%). Higher volumes were registered for most products except equines (-2.9%) and eggs (-1%).

Agricultural input costs (in real terms) showed an increase of 9.2% mainly due to higher prices (9.2%) on a slightly higher volume (0.5%). The rise in input prices was mainly driven by higher prices for feedingstuffs (16.9%), fertilisers (14.7%) and energy/lubricants (+11.9%).

Reflecting the output and input price developments, the estimates depict a remarkable increase in the agricultural income per annual labour unit of 6.5% in real terms as compared to 2010 in the EU. However, the actual range by country varies from -22.5% for Belgium to +43.7% for Romania.

2. The general **economic situation** reflects a continued albeit moderate recovery in 2011. Total Gross Domestic Product grew by 1.6% in 2011 in the EU and by 3% at world level². The overall pace of recovery remains gradual and uneven among the EU countries; the Baltic States recorded the highest GDP increase rates (Estonia 8%, Lithuania 6.1% and Latvia 4.5%) followed by Poland and Sweden (each by 4%) while Greece and Portugal, confronted with drastic fiscal austerity and high unemployment rates, registered negative growth of -5.5% and -1.9% respectively. The outlook for 2012 looks less favourable with GDP growth at 0.6% in EU and 2.7% at global level.

Overall consumer price inflation in 2011 is estimated at 3.1%, while food price inflation would stay at 3.2%. The Euro appreciated against the Dollar until August 2011 when it reached 1.43 \$/€. The following months were characterised by depreciation of the exchange rate, standing at 1.312 \$/€ at the end of 2011.

3. 2011 provisional data show an exceptional year for the EU **trade**: the EU recorded an agricultural trade surplus (around € 7 billion), for the second year in row.

¹ Source: Eurostat, Economic Accounts for Agriculture (EAA)

² Sources: EU GDP - Eurostat and world GDP - Global Insight

Estimated **EU agricultural exports** in value terms would reach around € 105 billion (+16% compared to 2010) of which 64% are processed final products. The increase in export value was particularly marked for "Spirits and liqueurs" and "Wine and vermouth" (each by +20% to reach more than € 8 billion), and "Cereal preparations" (+17% reaching € 6.6 billion). "Wheat (grains)" accounting for about half of exported commodities, increased by 11% and reached over € 4 billion in 2011. These products represented around 26% of all agricultural exports. The US remained the main destination for EU agricultural products with a value of € 14.6 billion (+8% compared to 2010). Exports to Russia continued their recovery also in 2011 (+14%), going above € 10.5 billion. Switzerland maintained position as the EU's third main destination of agricultural exports with a value of over 6.5 billion Euros (+7%).

The value of the estimated 2011 **EU agricultural imports** would increase to € 98 billion (+16% compared to 2010). As in the case of exports, processed final products represented the highest share in agricultural imports (51%). Tropical products were the most significant EU imports: "Fruits and Spices" and "Coffee, Tea and Mate" imports reached together a value of over € 18 billion. Oilcake imports were over € 7 billion and the category "Other animal or vegetable oils" stood at about € 8 billion. The abovementioned product groups combined represented almost 35% of all EU agricultural imports. In 2011 EU imports from Brazil, the main EU partner accounting for 14% in total agricultural imports, were higher than one year ago (it reached almost € 14 billion) and imports from the US increased from € 7.4 billion in 2010 to over € 8.2 billion in 2011 (+12%). For the EU third main supplier, Argentina, EU imports increased to € 6.3 billion.

Overview on agricultural markets³

4. The area cultivated under **cereals** (excluding rice) in the marketing year 2011/2012 is expected to stand at 56 mio ha. This would represent a decrease of 0.4 mio ha or 1% compared with the 2010/2011 level (-0.1 mio ha in EU-15 and -0.3 mio ha in EU-12). Average yields of 5.1 t/ha (4% above the yield in 2010/2011, slightly higher than the five-year average) led to a total cereal harvest estimated at 286.8 mio t, which is 3.4 % or about 9.4 mio t higher than in 2010/2011 (277.4 million t). As regards individual crops production, 2011 revealed a mixed picture: common wheat, oats, maize and sorghum recorded higher levels compared to 2010, while durum wheat, rye, barley, triticale and other cereals experienced a decline in production.⁴
5. EU-27 **oilseed** area is estimated at 11.5 mio ha in the marketing year 2011/2012. Total oilseed production would stand at 29 mio t. This would represent an increase of 1% in comparison with the previous year when oilseed production reached 28.7 mio t. Average oilseed yields would reach 2.5 t/ha, 2% lower than the 2.6 t/ha of 2010/2011.
6. **Protein crops** production would stand at 2.7 mio t in 2011/2012 (-4% compared to the previous year) on a -13% lower area.
7. The EU **rice** production reached 1.79 mio t (in milled equivalent) in 2010/2011, down 5 % from the record output in 2009/2010 but still by 9 % above the 5-year average. Due to the overall increase in 2010/2011, the area sown with rice reached a new record with

³ The reader should bear in mind the different marketing years (i.e. from harvest to harvest) for the agricultural products: cereals, oilseeds and olive oil (July-June), rice (September-August), sugar (October–September) and wine (August-July).

⁴ Barley and triticale would experience rather limited cuts. The decrease in production would be larger for durum wheat, rye, and other cereals (-10%, -12% and -6% respectively).

474 000 ha. Whilst the Italian rice output decreased by 6 % to 0.9 mio t, the Spanish production increased by 3 % to 0.54 mio t. In general, the yields were good with an average of 6.5 t/ha, however the Spanish yields, mainly due to the balanced water supply and the favourable weather conditions, were outstanding with 7 t/ha for Japonica and 8.3 t/ha for Indica.

The rice consumption increased by 7% to 2.59 mio t in 2010/2011.

The rice stocks at the end of the marketing year (31 August) were fairly high with 0.5 mio t, however by 9% lower than at the beginning of the marketing year. There were no rice public intervention stocks in 2010/11.

The milled equivalent rice imports increased from 0.9 to 0.97 mio t, whilst the exports remained stable at 0.21 mio t.

The paddy rice prices were by 60-180% above the reference price level in 2010/11. The major EU prices remained mainly stable during the 2010/11 marketing year, except for the Italian Japonica prices, which increased by 30% until March 2011 but returned to its former level again till July.

8. **Sugar** prices continued to be extremely volatile during most of 2011, although the volatility decreased somewhat towards the end of the year. World market prices for white sugar ranged from 400 €/tonne in May to 620 €/tonne in July 2011. According to the International Sugar Organization (ISO), global sugar production amounted to 165.2 mio t in 2010/2011, 4.7 mio t more than in 2009/2010. Sugar consumption reached 164 mio t, thus the campaign 2010/2011 resulted in a moderate global sugar surplus of 1.2 mio t. The situation is expected to improve further in the marketing year 2011/2012, when sugar production is expected to reach a record of over 172 mio tonnes (+7 mio t higher than in 2010/2011), whereas consumption would increase to 167.7 mio t. Thus, 2011/2012 would bring a sizeable surplus of about 4.5 mio t. Although Brazil's production is likely to fall by over 3 mio t, other major producers most likely will step up their production (Russia, India and EU are expected to produce altogether about 6 mio t more than the previous year and Chinese output could also increase by over 1 mio t).

The EU production of sugar and isoglucose under quota reached 13.8 mio t plus an additional 2.8 mio t of out-of-quota sugar in the 2010/2011 campaign, of which 0.5 mio t released on domestic market. On the basis of the Community balance sheet, the overall sugar and isoglucose consumption would be 16.5 mio t plus 1.4 mio t out-of-quota.

According to preliminary forecasts for 2011/2012, the EU sugar beet area would reach 1.56 mio ha (+3 % more than in 2010/2011 marketing year). The production under quota would reach 13.8 mio t of which 0.7 mio t for isoglucose. Weather conditions were very favourable during the campaign and in many regions record yields were reached. As a consequence a bumper out-of-quota sugar production could be realized amounting to 5.3 mio t, of which 0.4 mio t was released on the domestic market together with 0.021 mio t of out-of-quota isoglucose.

Exports of out-of-quota sugar in the marketing year 2010/2011⁵ were initially fixed at 0.65 mio t for sugar and 0.05 mio t for isoglucose, however increased to 1.35 mio t for sugar and 0.07 mio t for isoglucose later during the course of the marketing year. In respect

⁵ Commission Regulation (EU) No 397/2010 as amended by Commission Implementing Regulation (EU) No 461/2011 and Commission Implementing Regulation (EU) No 852/2011

of 2011/2012⁶ marketing year the quantitative limit for out-of-quota exports was fixed at 1.35 mio t for sugar and at 0.07 mio t for isoglucose.

During the 2010/2011 campaign 0.04 mio t of quota sugar were exported and additional 1.17 mio t were exported incorporated in processed products. Imports of sugar (including both white and raw sugar) amounted to 3.57 mio tonnes of white sugar equivalent and additional 0.528 mio t were imported in processed products.

On 1 October 2009 the white sugar reference price reached 404 €/t, its final level following the 2006 sugar reform. The average EU market price for sugar, following the developments on the world markets, increased significantly in 2011 and reached 654 €/t by December (+156 € from January 2011).

9. Total **must** production for wine and grape juice remained at a low level in 2010/2011. Estimates indicate a production of about 164.4 mio hl, of which 157.8 mio hl were vinified.

The 2010-2011 marketing year has been the first one under the new 2008 Common Market Organisation where the categories "quality wines" (Quality Wines Produced in Specified Regions) and "table wines" are replaced by wines with P.D.O, P.G.I, varietal wines and other wines. The table wines without geographical indications are from now on classified as "Other wines". As result of the low 2010/2011 production level and the increase of the exported volumes, the overall stock level decreased by 3.5 mio hl (-2%). Stocks of "Other wines" have decreased during the 2010/2011 campaign by 4.1 mio hl reaching at the end of the campaign 33.8 mio hl, corresponding to 9 months of human consumption.

In July 2011 Spanish red regular wines without P.D.O/P.G.I were marketed at 2.57 €/hectograde (+10% compared to the last year), Italian red regular wines without P.D.O/P.G.I at 3.04 €/hectograde (+26%), French red regular wines without P.D.O/P.G.I increased up to 4.52 €/hectograde (+21%). Quotations for white regular wines without P.D.O/P.G.I are often based on insufficient volumes to be considered truly representative.

Exports in volume increased by 23% reaching 22 mio hl, whereas imports slightly increased (+5%) during the campaign 2010/2011 compared to the previous one. However exports in value increased by 27% to €7.6 billion resulting in a positive trade balance of € 5.2 billion, an increase of 43% compared to 2009/2010.

10. 2011 will be remembered as the *annus horribilis* of almost the whole **Fruit and Vegetables** sector. Sanitary crisis (*E.coli*), warm weather and overlap of calendars pushed prices down at very low level, even worse than in 2009, already considered a bad year. In spring, particularly mild weather caused an early ripening of products, especially vegetables; hence peaks of supply occurred due to an overlap of seasons (end of southern Europe season and beginning of the northern Europe one). Vegetable prices were around -25% compared to 2010. On top of this already difficult situation, the so called "cucumber crisis" broke out in May. Cucumbers, tomatoes and lettuce were suspected of being contaminated by *E. coli*, provoking panic among the EU population. Many vegetables (and sometimes fruits) were eliminated from consumer's tables leaving European F&V producers in a difficult situation. In addition, Russia banned European vegetables for some weeks. Bad weather during summer and a generalised economic crisis around Europe did not help to lift consumption.

⁶ Commission Implementing Regulation (EU) No 372/2011, as amended by Regulation (EU) No 1238/2011

The production of **peaches** increased by 3.6% and **nectarines** by around 10% compared to 2010. In Spain a shift from apple trees to peach trees played a significant role in this increase. This, together with season overlapping, put **high downward pressure on the prices**. Peach prices decreased on seasonal average by 20% in 2011 compared to 2010 and remained for the whole season even lower compared to 2009. Prices for nectarines decreased on seasonal average of 25% and still -12% compared to 2009. Withdrawal measures were improved but summer bad weather further spoiled the season. Only late producers managed to recover some profit.

Production forecast for **apples** was set at 10.2 mio t for the EU in 2011, 5 % higher than in 2010, one of the lowest crops of the last decade. As a consequence 2011/2012 campaign shows prices 10% lower compared to the previous season due to the higher crop. However price differences among MS show huge differences mostly related to varieties. The 2011/2012 season started with almost cleared stocks. EU production of **pears** is expected to reach 2.5 mio t in 2011, 12% higher than in 2010 and above the average of the last three years. Prices show a remarkable decrease (-35%), all around EU, in particular some varieties.

EU oranges prices stagnated in the first half of the year, while frost hit many orchards in ES. On the other hand, 2010/2011 was an exceptional year for export of easy peelers, especially in the beginning of 2011. For 2011/2012 production forecasts for **citrus fruit** is expected at 10 mio t, -5% compared with last year. Oranges are expected to decrease by 2% compared to last year, and easy peelers would register a -11% drop. Lemons registered a decrease of 3% in production and faced a difficult kick off season due to generalised low prices.

Tomatoes together with other glass house vegetables, especially cucumber, courgettes and peppers suffered the most of the 2011 climatic and sanitary contingencies. Prices trend was already downward in the first half of the year when the E. coli crisis started. Round tomatoes prices were around 40% less than last year, reaching even lower level in the middle of the crisis. The beginning of 2011/2012 campaign saw also some difficulties to start; prices remained for some weeks well below the average, in spite of the good expectations due to the late summer that revitalised consumption. Specialities suffered less from the crisis.

2011 **potatoes** production increased almost everywhere in EU. Prices are showing a very low level compared to 2010.

According to preliminary data, EU imports of fresh or dried fruit and nuts decreased by 2.7% to around 11,3 million tonnes in 2011 following an ongoing trend of the past years. As usual, bananas (+1.5%) and other tropical fruit (+0.5%) account for more than a half of the imported volumes. Imports of nuts increased by 3.7% compared to 2010. Concerning imported products, mainly to complement the EU seasonal production, citrus fruit decreased by almost 15% representing 16% of the total fruit import, pip fruit decreased by -2.6% (7.7% of the total import), table grapes (-5.6%), while stone fruit increased of 7% while representing only 1.7% of the total imported fruit.

EU exports of fresh or dried fruit and nuts reached 3.4 mio t, +5.6% above the 2010 level. Exports of fresh apples decreased by 3.7%, while pear exports, following last years trend, increased by 13.4% compared to 2010, the main destination being Russia. Opposite to 2010, 2011 was a good year for citrus fruit exports (+16.8%) for all the products +15% for oranges +22% for easy peelers and +3% for lemons. Peaches and nectarines increased by

+13% following last year trend, at slower pace though; contrary to 2010, cherries recovered export markets showing a +51% compared to 2010.

In 2011, the EU imported slightly more than 2 mio t of fresh vegetables, which represents an increase of 1.1% compared to 2010 (excluding potatoes). Main imported products are tomatoes (-3.3%), onions (+8.4%), sweet peppers (+3%), carrots and turnips (-7.14%) and garlic (-38%). Potatoes import decreased of 15% compared to 2010. EU exports of fresh vegetables increased by 4.5% making up for 1.8 mio t in 2011, excluding potatoes. The main products exported are onions (-4.4%) followed by tomatoes (+26.4% in spite of the sanitary crisis), brassicas (+11.6%) and sweet peppers +10%. Surprisingly also cucumber registers an increase of +28.6%. Export of potatoes increased by +132%, 2011 will be remembered as an exceptional year for potatoes export to Russian Federation.

11. According to data submitted by producing countries, **olive oil** production in the 2010/2011 marketing year (1 July 2010 to 30 June 2011) is estimated to have reached 2.2 mio t (of which 1 380 000 t produced in Spain, 440 000 t in Italy, 300 000 t in Greece, 63 000 t in Portugal, 6 500 t in Cyprus, 6 000 t in France and 600 t in Slovenia). This quantity represents a 4% increase compared to 2009/2010. During the same period, olive oil prices decreased by 2% compared to the previous campaign. Regarding trade flows (including inward processing) and in comparison with 2009/2010, imports declined by 5% and reached 89 600 t in 2010/2011 while exports amounted to 586 200 t, 35% higher than the previous campaign.
12. As for the EU **beef** sector, the reduction of cattle herds continued in 2011 (-2.3% as compared to 2010). The number of cows decreased, particularly in Romania (-17.5%) and Italy (-6.3%). The situation in the dairy market contributed to this drop in the overall cattle herd. According to the more recent forecasts, EU beef and veal production would increase by 1.8% in 2011.

In beef trade with third countries the EU maintains its position as net exporter in volume. The main driver has been the firm demand from Russia and particularly the emergence of the Turkish market following the lowering of prohibitive tariffs at the end of 2010. Afterwards, the Turkish government has raised import tariffs for red meat to 75% in July 2011 to encourage imports of live cattle rather than beef.

Beef meat imports into the EU were 10% lower than 2010 as shipments from both, South America and Africa declined as a result of lower production from main supplying countries and the ban of imports from Botswana. USA and Australian beef exports to the EU continue to rise since the creation of a new duty-free quota for high quality beef. Further growth can be expected also from Canada, Uruguay and New Zealand that can also export with this quota. Beef meat exports would have increased by over 30% due to the low global availability, which led to an increasing demand for relatively high priced EU beef on the global markets. Exports to Turkey tripled for beef meat and increased five-fold in live animals.

The overall EU beef and veal consumption in 2011 is expected to remain at the same level than 2010, with a per capita consumption at 16.2 kg.

Producer prices recorded higher levels than in 2010 for all categories (young bulls, steers, cows and heifers). Quotations for young bulls increased in January and February and fell from March to June, ranging from 351 €/100 kg carcass weight in February to 333 €/100 kg in June. During the second half of the year, prices increased again and

reached their maximum level in December (380 €/100 kg). Also, steer, heifer and cow prices have followed similar patterns over 2011.

13. As far as the EU **pig sector** is concerned, high prices until the end of 2011 and cereal prices coming down have brought back the theoretical producer margins to the 5-year-average. The sector is facing a continuing process of concentration to larger production units. The sow herd slightly reduced. Nevertheless, the increasing trend in production continued in 2011, and the total production grew by 1.7%.

As regards exports, 2011 was an exceptional year. For the first time in its history, the EU exported more than 3 mio t of pig meat, an increase of over 20% against 2010 and representing nearly 12% of the domestic production. Hong Kong and China became the first export destination (30% of EU pig meat exports), followed by Russia (27%). Pig meat imports into the EU further decreased to 36 000 t in 2011, 13% down compared to 2010. Switzerland remained the main origin accounting for almost half of all EU imports.

Pig meat consumption is estimated to remain stable in 2011, whereas the per capita consumption would fall to 41.2 kg.

The 2011 EU average carcass price at 153.2 Euros/100 kg was 13 Euros/100 kg more than the year before. Aid for private storage was introduced for a period of three weeks in February 2011 to stabilise the market after the dioxin incident in Germany.

14. **Poultry meat** production increased slightly by 0.4% in 2011. Imports increased by 3% compared to 2010. Although it is still in top place (with a share of 70% of all imports), imports from Brazil only grew by 1%. The strongest increase has been seen for frozen fillets from Chile (+25%) and poultry meat preparations from China (+46%). EU has enjoyed a good level of exports during 2011 in particular due to a strong demand in China, the Middle East and Africa. EU poultry meat exports grew by 13% in 2011 as compared to 2010. Russia has become a less important market (-56%) while China (+72%), Hong Kong (+38%), Saudi Arabia (+32%) and Ghana (+73%) have grown considerably. Exports of poultry meat with refunds (mainly to the Middle East) remained stable. EU broiler prices are at their highest level in 15 years ranging from 176 Euros/100 kg to 194 Euros/100 kg.

According to the forecasts, EU poultry meat consumption in 2011 would slightly decrease (-0.6%) and per capita consumption would situate at 23.3 kg.

15. EU **sheep meat** production would slightly increase by 0.4% in 2011. Regarding trade, sheep meat imports in 2011 decreased by 8%. The volume of exports, though increased (+20%), represented 2% of the total production.

EU sheep meat consumption would fall by -2.5% and per capita consumption would situate at 2.1 kg.

Sheep meat prices increased in 2011 compared to 2010. The EU average price of light lamb in 2011 was 624 €/100 kg carcass weight (+6.8% as compared to 2010). The average price of heavy lamb amounted to 483 €/100 kg carcass weight (+11% as compared to 2010).

16. Dairy commodity markets continued recovering in 2011 driven by strong world demand. Despite a remarkable increase in supply (around 2%), dairy commodity prices remained at elevated levels throughout 2011 (butter +15%, SMP +8%, cheese (Edam) +11% against 2010), enabling a parallel increase in EU milk prices. First estimates for the 2011 EU price

depict an increase of 11% in raw milk (34€/100kg in 2011 compared to 30.5€/100kg in 2010). The prices decreased from 33.3€/100kg in March to 33€/100kg in April, and from that moment onwards they gradually increased to reach 35€/100kg by the end of the year, the highest price since 2008.

According to recent forecasts, **milk** deliveries to dairies would reach 138.6 mio t (+2% compared to 2010) with France, Ireland, Austria, the United Kingdom and Germany leading the growth in EU-15 milk deliveries (+2%) and the Baltic States and Poland generating a 1.9% increase in the EU-12.

Milk production is estimated to increase to 151.4 million tonnes (+1.5% compared to 2010) thanks to a continuous increase in milk yields both in EU 15 and EU 12 which compensates for the contraction in the herd. EU dairy herd size is estimated at 22.9 mio heads in 2011, corresponding to a reduction of 0.8%. The average yield per dairy cow is estimated to have increased to 6 431 kg (+1.9%).

With another 1% increase in milk quotas as part of the "soft landing" in view of their abolition in 2015, the rate of quota under-utilisation declined in the 2010/2011 quota year concluding with a net undershoot of 9.3 million tonnes (or -6%). Denmark, Cyprus, Luxembourg, the Netherlands and Austria have exceeded their respective quotas at an aggregate level of 199 thousand tonnes, which were subject to surplus levy payments valued at € 55.57 mio.

Cheese production slightly increased in 2011. EU production is estimated at 8 976 mio t for 2011, corresponding to an increase of 0.2%. Domestic use stayed broadly unchanged. EU exports are estimated to have reached 682 000 t (+0.9% more than the record set last year).

EU **butter** production is estimated to have increased by 2% in 2011 or 43 000 t, to reach 2.2 mio t. Imports declined due to unprecedented high prices on the world market. EU butter exports are estimated to have declined by 22% in 2011. EU consumption is expected to have improved by a limited 0.5% compared to 2010.

EU **skimmed milk powder** production is estimated to have increased by 13% in 2011 to reach 1 048 000 t driven by continuous growth in exports (+37%) and consumption would also have increased (to 626 000 tonnes). Between June - September 2011, the 94 000 t of SMP from the public stocks reserved for 2011 were removed under the most deprived persons' scheme.

Drinking milk production is estimated to have increased by 0.3% in 2011, cream by 1.2%, and fermented milk by 0.2%. Per capita consumption of **fresh dairy products** as a whole would have increased by a slight 0.1%.

17. At EU level, the average income⁷ from agricultural activities (measured in real terms as factor income per annual work unit) increased in 2011 by 6.5% as compared to 2010. The increase in agricultural income represents the combined result of an increase in **real agricultural income** (+3.7%) and a reduction in **agricultural labour input** (-2.7%).⁸

The rise in **real agricultural income** in 2011 is the result of an increase in the **agricultural output value at basic prices** in real value terms (+7.2%) and in the real value

⁷ This is the first estimate of farm income developments in 2011 (provided by Eurostat on the basis of information sent by Member States in December 2011)

⁸ Source: Eurostat, Economic Accounts of Agriculture

of agricultural **intermediate consumption** (+9.7%). The agricultural output value of both crop and animal production improved (by +7.5% and +7.7% respectively). The increase in **intermediate consumption** resulted from a slight increase in volumes (+0.5%) coupled with a **surge in input prices** which went up by 9.2% on average in real terms, driven mainly by price heights in feedingstuffs (+16.9%), fertilisers and soil improvers (+14.7%) and energy and lubricants (+11.9%). The slight decrease in **fixed capital consumption** (-0.1%) combined with higher levels in **taxes paid on production** (+1.3%), compensation of employees (+0.4%), rents to be paid (+1%) and interest paid (+2.2%) led to higher production costs. Finally, the -0.4% decrease in **other subsidies on production** had a marginal impact on the level of revenues in the agricultural sector in 2011.

Agricultural income per worker in 2011 was above the 2010 levels in nineteen Member States. The largest increases were observed in Romania (+43.7%), Hungary (+41.8%), Ireland (+30.1%), Slovakia (+25.3%) and Luxembourg (+25.2%), while significant drops were recorded in Belgium (-22.5%), Malta (-21.2%), Portugal (-10.7%), Finland (-9.6%) and the Netherlands (-8.2%).

18. The **agricultural labour** input in the EU fell by 2.7% in 2011 as compared to 2010. The highest reductions were recorded in Bulgaria (-9%), Belgium and Romania (each by -7%) while it increased in Slovakia (+7%).⁹

**Statistical and economic
information**

Codification of the tables

The choices made for the revision of the tables are reflected in a new codification, established on the basis of the same principle for all the tables. Each of them has been given a code with four digits, the first of which designates the subject to which the table refers (see table of contents following this foreword):

1. Conversion rates,
2. Basic data,
3. Economic tables,
4. Tables on agricultural markets.

The second and third digits refer to specific aspects of the field concerned and their significance varies from one field to another.

For the tables concerning the agricultural markets (Tables 4) a standard codification for all the products has been used for these two digits:

- (i) the second digit of the code designates the agricultural product concerned,
- (ii) the third digit refers to the nature of the statistic presented:
 - .–.0.– livestock numbers,
 - .–.1.– area, yields and production (crop products) or slaughterings and production (livestock products),
 - .–.2.– world production,
 - .–.3.– external trade,
 - .–.4.– supply balance,
 - .–.5.– prices (producer prices, market prices, consumer prices),
 - .–.6.– market management,
 - .–.9.– various.

For certain sectors, all the possibilities are used (e.g. cereals). For other products only some are used (e.g. potatoes), either because the data needed are not available or because the features of these sectors in the EU do not justify such an exhaustive presentation in a general document such as this, which, for considerations of space, can provide only the most important information.

Currency units used in this report

1. European Monetary System (EMS) – ecu

Entry into force of the EMS on 13 March 1979 (Regulations (EEC) No 3180/78 and No 3181/78 of 18 December 1978) brought in the ecu as sole unit of account for the Community. Its definition is identical to that of its predecessor the EUA except for a review clause allowing changes in its composition. The ecu is a currency unit of the 'asket' type made up of specified amounts of currencies of the EMS member countries determined mainly on the basis of the economic size of each. It is defined by Council Regulation (EC) No 3320/94. The central rates used in this system are rates set by the central banks around which the market rates of the EMS currencies may fluctuate within spot margins.

2. The ecu in the common agricultural policy

- Before 9 April 1979, the unit of account used in the agricultural sector was the u.a. defined by Regulation (EEC) No 129/62 and the representative rates (green rates) were fixed by the Council.
- On 9 April, the ecu began to be used in the CAP (Regulation (EEC) No 652/79) and is still being used (Regulation (EEC) No 3813/92).
- On the changeover from the u.a. to the ecu on 9 April 1979 common agricultural prices and amounts expressed in u.a. and converted into ecus were adjusted by the coefficient 1,208953. The green rates were however adjusted by the reciprocal coefficient 1/1,208953, leaving national price levels unchanged.
For example, $100 \text{ u.a.} \times 3,40 = \text{DEM } 340$ because $\text{ECU } 121 \times 2,81 = \text{DEM } 340$.
- For the recording of world market prices, offer prices are converted at the representative market rate, which is an average of the rates recorded on the market. The common agricultural prices and amounts are set in ecus and converted into national currency at the agricultural conversion rates.
- Since 1 January 1993 these have been adjusted by the Commission whenever their divergence from representative market rates exceeds specified margins.
- Between the beginning of the 1984/85 marketing year and 31 January 1995 all conversion rates used for agriculture were multiplied by a correcting factor under the 'switchover' mechanism the effect of which was to express the common agricultural prices and amounts in a unit of account derived from the ecu, the 'green ecu'. This correcting factor, originally 1,033651, was increased in line with the revaluation of the EMS currency appreciating most among those observing all the rules. On abolition it was 1,207509. As on the changeover from the u.a. to the ecu in 1979 common agricultural prices and amounts were increased in ecus by a factor of 1,207509 on 1 February 1995 and all conversion rates used in agriculture reduced by a factor of 1/1,207509 so making the operation neutral in national currency terms.

3. Introduction of the euro

On 1 January 1999, the currencies of the 11 Member States adopting the single currency were replaced by the euro but, during the transitional period until the end of 2001, units of national currency will continue to be used as subdivision of the euro. Series in ecus have been left unchanged as far as the past is concerned but are expressed in euros from 1 January 1999. Series in euro are the statistical continuation of series in ecus.

Fixed conversion rates of the euro

The conversion rates irrevocably fixed between the euro and the currencies of the Member States adopting the euro are:

EUR 1	=	40,3399 Belgian francs	
	=	1,95583 German marks	
	=	166,386 Spanish pesetas	
	=	6,55957 French francs	
	=	0,787564 Irish pounds	
	=	1936,27 Italian lira	
	=	40,3399 Luxembourg francs	
	=	2,20371 Dutch guilders	
	=	13,7603 Austrian schillings	
	=	200,482 Portuguese escudos	
	=	5,94573 Finnish marks	
	=	340,750 Greek drachmas	(On 1 st January 2001)
	=	239,640 Slovenian Tolar	(On 1 st January 2007)
	=	0,58274 Cyprus pound	(On 1 st January 2008)
	=	0,429300 Maltese lira	(On 1 st January 2008)
	=	30,1260 Slovak koruna	(On 1 st January 2009)
	=	15,6466 Estonian kroon	(On 1 st January 2011)

According to context, different currency units have been used in this publication. The statistical series in terms of value are also calculated:

- at constant exchange rates, i.e. at the exchange rates obtaining during a specific period (e.g. 1980). These rates are used to eliminate the influences of exchange-rate changes on a time series;
- at current exchange rates (notably for external trade).

To assist the user of this publication wishing to convert units of account into national currencies and conversely, Table 1.0.1, gives the rates to be used. Fuller information is given in specialized publications of the European Commission.

Observations on statistical method

A – Statistics on external trade – explanatory note

Council Regulation (EEC) No 1736/75, of 24 June 1975, on the external trade statistics of the Community and statistics of trade between Member States, includes provisions to ensure that data are not recorded twice:

- (i) when goods from a non-member country are first brought into a Member State, that Member State must record the import according to the origin of the goods;
- (ii) if the goods are then subject to a legal operation (for example clearance for consumption) and subsequently imported into another Member State, the latter must record the goods according to the Member State from which they were received.

However, to satisfy national requirements, the Member States may, if they wish, operate in parallel with the above system the arrangements they applied previously; this means that a Member State's national data may be substantially different from the data supplied by Community sources.

For the calculation of the intra-Community trade of the Community as a whole in the supply balances, there were two possibilities: the sum of the Member States' intra-Community exports (calculation on the basis of goods leaving) or the sum of the Member States' intra-Community imports (calculation on the basis of entries). Eurostat has chosen the second alternative. Also, exports to non-member countries in the supply balances of the Community as a whole are calculated by deducting intra-Community trade from Member States' total exports.

As a result, there may be discrepancies between the external trade data given in the supply balances and those given in the specific external trade tables.

Users must also allow for a break in the series of Community external trade statistics in 1977, the date on which Regulation (EEC) No 1736/75 entered into force.

A last point is that, while the data relating to the external trade of the Community of Twelve from reference year 1985 use the same source for all the Member States (Community statistics), those which refer to a previous period may have been obtained from the Community statistics for the Community of Ten and from other sources for the new Member States.

B – Definition of Agricultural Products for External Trade Statistics

Agricultural products are defined as follows:

Chapters 1 – 24 of the Combined Nomenclature excluding fish and fish products:

Agricultural products are defined as follows:

Chapters 1 – 24 of the Combined Nomenclature excluding fish and fish products:

- chapter 03 fish and crustaceans, molluscs and other aquatic invertebrates
- 0511 91 90 products of fish and crustaceans,
- 1604 prepared fish; caviar, and caviar substitutes prepared from fish eggs
- 1605 prepared crustaceans, molluscs, and other aquatic invertebrates
- 1902 20 10 stuffed pasta, containing >20% fish, crustaceans,
- 2301 20 flours, meals and pellets of fish or crustaceans,

adding the following products outside the Chapters 1 to 24. (“Other products covered by the Uruguay Round Agreement”):

- 2905 43 mannitol
- 2905 44 D-glucitol (sorbitol)
- 2905 45 glycerol
- 3301 essential oils
- ex 3302 10 preps containing flavouring agents for beverages
- 3301 to 3305 albuminoidal substances, modified starches, glues
- 3809 10 finishing agents
- 3823 11 stearic acid
- 3823 12 oleic acid
- 3823 13 tall oil fatty acids
- 3823 19 other
- 3823 70 industrial fatty acids
- 3824 60 sorbitol n.e.p.
- 4101 to 4103 hides and skins
- 4301 raw furskins
- 5001 to 5003 raw silk and silk waste
- 5101 to 5103 wool and animal hair
- 5201 to 5203 raw cotton, waste and carded or combed cotton
- 5301 raw flax
- 5302 raw hemp

C – Economic Accounts for Agriculture (EAA): implementation of a new methodology

1. The Economic Accounts for Agriculture are drawn up according to a new methodology, which was published in the "Manual on Economic Accounts for Agriculture and Forestry EAA/EEA (Rev. 1.1)" (EUROSTAT, 2000, ISBN 92-828-2996-0).
2. The introduction of the new methodology has resulted in a number of changes in the data, as a result both of the change in the methodology itself and of the use of new data sources. Some of the changes have had a direct impact on value added and thus on the measurement of agricultural incomes, whereas others have altered only the level of certain aggregates without, however, affecting value added and the measures of agricultural income.
3. The following methodological revisions affecting the measures of agricultural income can be noted:
 - a. The recording of secondary, non-agricultural activities of agricultural units where these activities cannot be separated from the main agricultural activity. This mainly concerns the processing of agricultural products and agri-tourism.
 - b. The exclusion of the output of units producing solely for own-final consumption (e.g. kitchen gardens).
 - c. The exclusion of upstream and downstream production activity involved in seed multiplication.
 - d. The recording of the output of wine and olive oil (from grapes and olives produced on the holding).
 - e. The recording of various operations according to the principle of rights and obligations, meaning that the amounts are recorded during the year in which the claim or obligation, in the economic sense of the term, is created, transformed or removed. For example, the value of subsidies recorded in the accounts for year n corresponds to aid granted in year n even if all or part of the payment takes place in year n+1 or at a later date.
 - f. The reclassification of certain agricultural aid which used to be classed as "operating subsidies" and which will now be recorded as "capital transfers". The value of this aid will no longer enter into the calculation of income.
4. Revisions which have had no impact on the measurement of income (all things being equal) concern:
 - a. The valuation of output at basic prices. The basic price is defined as the price received by the producer, after deduction of all taxes on products but including all subsidies on products.
 - b. The abandonment of the concept of national farm: besides production sold, stocked or for own-consumption by agricultural units, the production of the agricultural industry will now include a part of output used as intermediate consumption by the same unit (for example, grain or forage used in animal feed).

D – Annual rate of change (% TAV)

1. The annual rate of change (symbol: % TAV) is used throughout this report for the calculation over periods of time of changes in a given aggregate. It measures the compound annual average increase or reduction, as a percentage, of the variable concerned from a base year (T in the following equations).
2. The annual rate of change is calculated as follows:

$$100 \times \text{Anti-Log} \left[\text{Log} \frac{(\text{statistic for year } T + N)}{(\text{statistic for year } T)} : N \right] - 100 = \% \text{ TAV}$$

Where the annual rate of change is calculated over only two successive years, $N = 1$ and the formula becomes:

$$100 \times \left[\frac{\text{statistic for year } T + 1}{\text{statistic for year } T} \right] - 100 = \% \text{ TAV}$$

3. The following series illustrates the use of this formula:

	1990	1991 ...	1995	1996
Series =	100 000	112 000	161 051	177 156
	<u>1991</u>	<u>1995</u>	<u>1996</u>	
	1990	1990	1995	
% TAV	12,0	10,0	10,0	

Remarks

1. From 1991 data for the former German Democratic Republic are included in the figures for the Federal Republic of Germany and accordingly in the figures for the EU as a whole.
2. Present report was based on data available on 28/01/2011.
3. From 1 January 1997 statistics for France and Spain have been amended to include the French overseas departments (Guadeloupe, French Guiana, Martinique and Réunion) and the Canary Islands respectively.
4. Data on the Candidate Countries are gradually included in our tables. These data are mostly based on the figures provided by Eurostat and the Directorate-General for Agriculture and Rural Development. The process of harmonising the national statistics in the candidate countries is under way. The figures provided are therefore not fully comparable with the figures for the European Union and are expected to be revised frequently. We are publishing them for information only. The Commission cannot be held responsible for how the figures given for these countries are used or interpreted.

⁽¹⁾ See notes on methods (C).

⁽²⁾ Productivity of intermediate consumption is measured by the ratio between the index of the output volume in the agricultural activities sector and the index of intermediate consumption volume.

⁽³⁾ The 'terms of trade' in agriculture are measured by the ratio between the index of nominal output prices in the agricultural industry and the index of nominal intermediate consumption prices.

The farm accountancy data network (FADN) collects accountancy data from a sample of agricultural holdings in the Community. The FADN field of survey relates to 'commercial' farms, i.e. farms which market the bulk of their production and which exceed a minimum level of economic activity defined in terms of economic size (see the definition of the European size unit below).

In the most recent accounting years there were about 80 000 holdings (Community of 27 Member States) representative of commercial farms in the FADN sample.

The terms used in the tables relate to the following definitions.

BASIC FADN TERMS

Accounting year

The accounting year is a 12-month period starting between 1 January and 1 July, the exact date varying from one Member State to another.

Economic size and European size unit (ESU)

The European size unit (ESU) is a unit of measurement of the economic size of the agricultural holding. A farm has an economic size of 1 ESU if its total standard gross margin is EURO 1 200 of SGM. The standard gross margin for each enterprise corresponds to the average value, over a three-year period and in a given region, of production minus certain variable costs (Decision 85/377/EEC).

Type of farming(TF)

The type of farming (TF) of a holding is determined by the relative share in the holding's total standard gross margin of each of the enterprises of the holding. A description is given in Table 3.2.2. The results given in the following tables relate to eight groups aggregated from the 17 principal types of farming in the Community farm typology (Decision 85/377/EEC).

Weighting and number of holdings represented

The holdings in the FADN sample are selected in such a way as to be representative, for each division, of the holdings belonging to each cell formed by the combination of TF and economic size class. The populations to be represented are derived from the Community farm structure surveys.

The results presented are weighted averages. Each holding in the FADN sample is attributed a weight proportional to the number of holdings belonging to the same type of farming and the same economic size class in the division.

The number of holdings represented is the sum of the weights of the holdings in the sample. Some cells (division – TF – economic size class) may have no holdings in the sample, either because very high selection rates would be necessary or because there are technical difficulties in selecting holdings.

STRUCTURAL DATA

UAA: utilized agricultural area (in hectares).

Annual work unit (AWU and FWU)

This represents the agricultural work done by one full-time worker in one year. Part-time and seasonal works are fractions of an AWU.

An FWU is an AWU of unpaid (family) labour.

AVERAGE RESULTS PER HOLDING***Total output***

This is the value of total production during the accounting year. Included are off-farm sales, home-grown feed and seed, farmhouse consumption and benefits in kind, as well as changes in the value of livestock and stocks of crop products.

Intermediate consumption

This corresponds to all the fixed and variable costs that are necessary for agricultural activity and includes home-grown feed and seed but excludes financial charges, labour costs, rent and depreciation.

Depreciation

This is the annual provision designed to replace the fixed components of working capital at the end of their life (buildings, machinery, equipment, etc.). It is calculated on the basis of replacement value.

Farm net value-added (FNVA)

Total output less intermediate consumption and depreciation, adjusted to take account of taxes, grants and subsidies linked to production.

This is an indicator of the economic performance of the holding. It remunerates family and hired labour, own and borrowed capital and the management of the holding.

Family farm income (FFI)

This corresponds to farm net value-added, less other real costs in the accounting year: interest and financial charges, wages and social security costs paid and rent.

This indicator represents the return on the labour of farmer and family, and on owned capital.

3.2.2 The eight types of farming: shares of each enterprise in total output

Description of the types of farming in Table 3.2.3

Type of farming (principal types) EU-27	TF codes	Enterprise output as % of total output												
		Cereals	Other field crops	Vegetables and flowers	Fruits	Wine and grapes	Olives and olive oil	Dairying	Beef and veal	Sheep and goats	Pigmeat	Poultry and eggs	Other	Total

⁽¹⁾ Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

⁽²⁾ Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

⁽³⁾ Provisional results for 2009.

⁽⁴⁾ The totals may not add up due to rounding of the numbers of represented farms.

Source: European Commission, Agriculture and Rural Development DG, FADN (population : 2007 structure survey; classification : standard gross margins « 2004 »).

3.2.4 Results by economic size of holding (2008 and 2009) ⁽¹⁾

Economic size of holding in European size units (ESU)		Number of holdings in the FADN field of observation ⁽⁴⁾		Area (ha UAA)		Average results per holding in (1 000 EUR) (current)											
						Total output		Intermediate consumption		Depreciation		Farm net value-added		Farm net value-added per AWU		Family farm income per unit of unpaid labour ⁽²⁾

⁽¹⁾ Results for groups of less than 15 holdings are not considered representative and are therefore not included in the table, although they are included in totals.

⁽²⁾ Use with caution because the figures include farm holdings for which this variable is not relevant (e.g. companies and cooperatives).

⁽³⁾ Provisional results for 2009.

⁽⁴⁾ The totals may not add up due to rounding of the numbers of represented farms.

Source: European Commission, Agriculture and Rural Development DG, FADN (population : 2007 structure survey; classification : standard gross margins « 2004 »).

⁽¹⁾ The EU index of farm input prices is a Laspeyres index, whereas the deflated price series (see Table 3.1.8) is a Paasche index.
The discrepancies between the figures in the two tables are mainly a matter of the differing index formulae.

⁽²⁾ Indices of the prices of goods and services of current agricultural consumption.

⁽³⁾ Annual indices include fruit and vegetables.

⁽⁴⁾ Source: SCEES.

Source: European Commission, Eurostat ('Purchase price of inputs' and 'Producer prices for agricultural products' are harmonized indices, whereas 'Farm wages' remain heterogeneous national indices).

3.3.7 Price indices for feedingstuffs, fertilizers and soil improvement, fuels and lubricants,
and investments in machinery (excluding VAT)

Commission Regulation (EC) No 794/2004 of 21 April 2004 implementing Council Regulation (EC) No 659/1999 laying down detailed rules for the application of article 93 of the EC Treaty (OJ L 140, 30.04.2004).

⁽¹⁾ Data do not include all regional expenditures

Source: European Commission, Agriculture and Rural Development DG and DG COMP.

There are several sources of Community statistics enabling employment in agriculture to be measured from various viewpoints, including employment statistics proper (labour force sample survey) and agricultural statistics (structural surveys of agricultural holdings). Methods and concepts vary from one source to another, and the purpose of this introduction is to help the user to choose, among the statistics given in the subsequent tables, those which will provide him with the information he seeks.

EMPLOYMENT IN AGRICULTURE AND IN THE OTHER SECTORS

One approach to employment in agriculture consists in considering it as a part of overall employment and comparing it with employment in the other economic sectors. The relevant information comes from labour market statistics; in these figures, the persons employed are assigned to that economic sector in which they mainly work, and the characteristics of employment are measured according to identical concepts from one sector to another. Changes over time in numbers employed in the various sectors, and, in particular, in agriculture, as well as detailed information on the structure of employment in agriculture compared with that of other sectors (breakdown by sex, by occupational status, by working time, or by age) are given by the labour force survey, which provides a 'photograph' of employment in any given year (Tables 3.5.1.2 to 3.5.1.4).

EMPLOYMENT IN AGRICULTURAL HOLDINGS

Only the statistics which have just been presented allow a proper comparison of employment in agriculture with employment in the other sectors. However, they do not cover all persons employed in agriculture: an important feature of farming is that so many farmers and farm workers work only part-time and often also have other jobs. In the employment statistics, such persons are not classified as working in agriculture.

A full measure of employment in agriculture is provided by the surveys on the structure of agricultural holdings; it should be noted that the information from this source enables employment in agriculture to be analysed as such but that, as it is established according to specific definitions, it cannot be compared with employment data for other sectors.

These surveys cover all persons employed on holdings, whether farming is their main activity or not; they also record working hours and any other remunerated work outside farming. They thus enable employment on agricultural holdings to be measured fully, and part-time and combined other employment to be analysed. By conversion of the numbers of persons employed into full-time equivalent workers ('annual work units' – AWU), the data on working hours give information on the actual volume of labour devoted to farming, the only valid measure of the labour contribution to agriculture, in view of the scale of part-time working (Tables 3.5.1.5 and 3.5.1.6).

⁽¹⁾ 'Persons employed' include all persons working for remuneration or self-employed, plus unpaid family workers.

Persons employed in more than one economic sector are counted only in the sector of their main activity.

NACE 1.1 in 2008							

The calculation of percentages in this table excludes respondents that did not answer the question on economic activity.

Note: 2005 to 2007 (2008 for Türkiye): NACE Rev 1.1; 2008 - 2010: NACE Rev. 2

(u): Reduced reliability due to small sample size

Source: European Commission, Eurostat (Community labour force survey - LFS).

(¹) Sole holders who are also managers. The holder is the person for whom and on whose behalf the holding is farmed; the manager is the person responsible for the current, day-to-day management of the holding. In EU-25 in 2003, 93 % of agricultural holdings were farmed by holders who are also managers.

(²) Holders working their farms for respectively 100 %, 50 to < 100 %, and less than 50 % of the annual working hours of a full-time worker.

Source: European Commission, Eurostat (Surveys of the structure of agricultural holdings).

3.6.1.1 Overview of the implementation of direct payments under the CAP in Member States (Reg (EC) N° 73/2009)(¹)

(Version June 2010)

MS	Start SPS	Regions	Model SPS / SAPS(²)	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Support under Articles 68 - 72
Belgique/ Belgie	2005	Zone Nord: Flanders + Brussels	SPS historical	100 €	Suckler cow premium: 100% Slaughter premium calves: 100% Protein crops, Flax for Fibre	For a better quality—all sectors 68(1)(a)(ii)
		Zone Sud: Wallonia			Suckler cow premium: 100% Protein crops, Flax for Fibre	Grassland premium – breeding 68(1)(b)
Bulgaria	-	-	SAPS	0,5 ha 100 €	F&V: Transitional soft fruit payments: 100%	In the dairy sector 68(1)(b)
Česká republika	-	-	SAPS	1 ha	Separate sugar payments: 100% F&V: Separate payment for tomatoes intended for processing: 100%	Aid for dairy farmers 68(1)(b)
Danmark	2005	one region	SPS dynamic hybrid	2 ha 300 € Sp	Special male bovine premium: 75% Sheep and goat premium: 50% Starch Potato, Dried fodder, Flax for Fibre	Agri-environment Measures 68(1)(a)(v) Perennial Energy Crops 68(1)(a)(i)
Deutschland	2005	Bundesländer (Berlin included in Brandenburg, Bremen in Lower Saxony and Hamburg in Schleswig-Holstein)	SPS dynamic hybrid moving to a flat rate	1 ha	Protein Crops, Nuts, Starch Potato, Dried fodder, Flax for Fibre	Grassland premium in dairy sector 68(1)(b)
Eesti	-	-	SAPS	1 ha	-	In the dairy sector 68(1)(b)
Éire/Ireland	2005	-	SPS historical	100 €	Protein Crops, Dried Fodder	Grassland Sheep Scheme and Grassland Dairy Efficiency 68(1)(b) Conservation in the Burren 68(1)(a)(i)
Elláda	2006	-	SPS historical	200 €	F&V: - Until end 2010: 30% of the envelope for tomatoes intended for processing - Cotton, Sugar, Dried fodder, - Small Aegan Islands 100 %	Improvement of quality of olive oil, durum wheat 68(1)(a)(ii) LFA producers in meat sectors (beef, sheep and goat) 68(1)(b) Restructuring programmes in LFA Mountainous areas 68(1)(c)

3.6.1.1S1

MS	Start SPS	Regions	Model SPS / SAPS ⁽²⁾	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Suppor under Articles 68 - 72
España	2006	-	SPS historical	100 €	Suckler cow premium: 100% Slaughter premium calves: 100% Slaughter premium bovine adults: 40% Seeds, Protein Crops, Rice, Nuts, Cotton 35%, Sugar, Dried fodder, Flax for Fibre, Starch Potato 60% Outermost regions: 100% F&V: - Until end 2010: 50% of the envelope for tomatoes intended for processing	Improving quality of legumes, tobacco sheep and goat farmers and milk products 68(1)(a)(ii) National programme crop rotation 68(1)(a)(v) Aid to sheep and goat producers and milk producers in LFA 68(1)(b) Ex article 69 measures (beef ,cotton, sugar, milk) 72(3)
France	2006	-	SPS historical	100 €	Suckler cow premium 75% Seeds (some species), Protein Crops, Rice, Nuts Starch Potato, Dried fodder, Flax for Fibre Outermost regions 100% F&V: - Until end 2011: 50% for tomatoes intended for processing - Until end 2010: 98% of national enve	Additional aid for protein crops 68(1)(a)(i) Aid for quality of durum wheat 68(1)(a)(ii) To maintain organic farming 68(1)(a)(v) Diversification of crop rotation 68(1)(a)(v) Aid for calves from suckling cows and for organic labelled calves; aid for sheep

3.6.1.1S2

MS	Start SPS	Regions	Model SPS / SAPS(2)	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Support under Articles 68 -72
Italia	2005	-	SPS historical	100 €	Seeds, Protein Crops, Rice, Nuts, Sugar Dried Fodder, Flax for Fibre F&V: - Until end 2010: 50% for tomatoes intended for processing - Until end 2010: 100% for pears, peaches and prunes intended for processing. - From 2011 until end 2012: 75% of en	Improvement of quality (beef and veal; sheep and goat meat; olive oil; dairy products; tobacco; sugar; floricultural products) 68(1)(a)(ii) Crops rotation 68(1)(a)(v) Insurance payments for harvests, animals and plants 68(1)(d)
Kýpros	-	-	SAPS	0,3 ha	F&V: - Until end 2010: 100% of national envelope for citrus fruits - Until end 2012: 75% of national envelope for citrus fruits	-
Latvija	-	-	SAPS	1 ha	Separate sugar payments: 75% F&V: Transitional soft fruit payment: 100%	In the dairy sector 68(1)(b)
Lietuva	-	-	SAPS	1 ha	Separate sugar payments: 100% F&V: Transitional soft fruit payment: 100%	-
Luxemburg	2005	one region	SPS static hybrid	100 €	none	-
Magyarország	-	-	SAPS	1 ha 0,3 ha for orchards and vineyards	Separate sugar payments: 100% F&V: - Separate F&V payments (tomatoes and other fruits): 100% - Transitional soft fruit payment: 100%	In the dairy sector 68(1)(b) For tobacco and fresh fruit and vegetables growing areas subject to restructuring and development programmes 68(1)(c)
Malta	2007	one region	SPS regional	0,1 ha 100 € Sp	none	-
Nederland	2006	-	SPS historical	500 €	Seeds for fibre flax Starch Potato, Dried Fodder, Flax for Fibre	For transport over water 68(1)(a)(i) Animal welfare 68(1)(a)(iv) Electronic I&R for sheep 68(1)(b) Weather insurance 68(1)(d)

3.6.1.1S3

MS	Start SPS	Regions	Model SPS / SAPS(2)	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Support under Articles 68 - 72
Österreich	2005	-	SPS historical	100 €	Suckler cow premium: 100% Nuts, Starch Potato, Dried Fodder, Flax for Fibre	Dairy cow premium 68(1)(b)
Polska	-	-	SAPS	1 ha	Separate sugar payments: 100% F&V: - Separate F&V payment for tomatoes: 100% - Transitional soft fruit payment: 100%	For cultivating pulses and herbage legumes 68(1)(a)(i) For keeping cows in South-eastern Poland and sheep in Southern Poland 68(1)(b)
Portugal	2005	-	SPS historical	0,3 ha	Suckler cow premium: 100% Slaughter premium calves: 100% Slaughter premium bovine adults: 40% Sheep and goat premium: 50% Seeds: 100% Protein Crops, Rice, Nuts, Cotton, Sugar, Dried Fodder Outermost regions: 100% F&V: Until end 2011: 50% of envelope for tomatoes intended for processing	Extensive handling systems for autochthonous races (beef, sheep, goats) 68(1)(a)(i) Quality improvement of agricultural products (crops and animals) 68(1)(a)(ii) Agri-environmental measures for protection of olive national patrimony and support to extensive pasturing 68(1)(a)(v) To economic vulnerable types of agriculture in milk and sheep sectors 68(1)(b)
România		-	SAPS	1 ha	Separate sugar payments: 100% F&V: Until end 2011: 50% of envelope for tomatoes intended for processing	For improving quality in the organic farming sector 68(1)(a)(ii) To the milk sector in LFA 68(1)(b)
Slovenija	2007	one region	SPS regional	0,3 ha / 100 € Sp	Special male bovine premium: 65% Protein Crops, Nuts	For extensive rearing of female bovine animals and dairy payment for farmers in mountain areas and on steep hills 68(1)(b) Preserving animal rearing on farms with permanent pastures 68(1)(c)
Slovensko	-	-	SAPS	1 ha	Separate sugar payments: 50% F&V: - Separate F&V payment: 67% (Art. 127 of Reg. 73/2009) Separate transitional F&V payment: 33% of envelope for tomatoes intended for processing (Art. 128 of Reg. 73/2009)	In the dairy sector 68(1)(b)

3.6.1.1S4

MS	Start SPS	Regions	Model SPS / SAPS ⁽²⁾	Min. Requirements	Sectors remaining coupled and transitional coupled payments of the Fruit & Vegetables sector	Specific Support under Articles 68 - 72
Suomi/Finland	2006	three regions (based on reference yield)	SPS dynamic hybrid moving to a flat rate	200 €	Sheep and goat premium: 50% Seeds (timothy seed), protein Crops, Starch Potato, Dried Fodder; Flax for Fibre	Supporting beef and veal production; dairy cow premium 68(1)(b) Ex-Art 69 measures (arable crops) 72(3)
Sverige	2005	five regions (based on reference yield)	SPS static hybrid	4 ha 100 € Sp	Special male bovine premium 74.55% Starch Potato, Dried Fodder	Ex-Art 69 measures: Improving quality and marketing (all sectors) 72(3)
United Kingdom	2005	England normal	SPS dynamic hybrid moving to a flat rate	1 ha 200 € Sp	Protein Crops, Nuts Dried Fodder, Flax for Fibre	-
		England - moorland	SPS dynamic hybrid moving to a flat rate	1 ha 200 € Sp	Protein Crops, Nuts Dried Fodder, Flax for Fibre	-
		England - SDA minus moorland	SPS dynamic hybrid moving to a flat rate	1 ha 200 € Sp	Protein Crops, Nuts Dried Fodder, Flax for Fibre	-
		Scotland	SPS historical	3 ha 200 € Sp	Dried Fodder, Flax for Fibre	-
		Wales	SPS historical	1 ha 200 € Sp	Dried Fodder, Flax for Fibre	-
		Northern Ireland	SPS static hybrid	100 €	Dried Fodder, Flax for Fibre	-

⁽¹⁾ For the statutory dates and amounts of decoupling please see Annex XI and XII of Regulation (EC) No 73/2009

⁽²⁾ Hybrid model consist of elements from the regional and the historical model

NB:

- SPS = Single payment scheme
- SAPS = Single area payment scheme
- F&V = Fruit and Vegetables
- Sp = Special entitlements

(¹) Regulation (EC) No 1973/2004 - Annex XXI

The agricultural area under the single area payment scheme set out in Annex XXI of Commission Regulation (EC) No 1973/2004 is a regulatory area used to calculate the national aid amount per hectare. The total number of eligible area declared by the farmer in a given calendar year may vary from that area.

(²) Provisional figures supplied by the Member States and subject to verification and control by the Commission.

(³) Regulation (EC) No 1121/2009 - Annex VIII

The agricultural area under the single area payment scheme set out in Annex VIII of Commission Regulation (EC) No 1121/2009 is a regulatory area used to calculate the national aid amount per hectare. The total number of eligible area declared by the farmer in a given calendar year may vary from that area.

(⁴) Total determined area used for the calculation of the coefficient of reduction supplied by the Member States and subject to verification and control by the Commission.

⁽¹⁾ In the EU all area cultivated under GMOs for commercial purposes refers to maize (Bt maize) and potato ("Amflora" in the Czech Republic, in Sweden and in Germany on 150 ha, 80 ha and 15 ha, resp.) while in third countries the GMO can be soya, maize, cotton, rapeseed and sugarbeet. Potatoes, tobacco, squash, papaya and sweet pepper GM varieties are also cultivated in small areas already.

Sources: Competent authorities of EU Member States, USDA, FAO and ISAAA.

4.23.1.2 World areas by crop (GMOs) (1)

	Mio ha					% of total
	2006	2007	2008	2009	2010	2010
